

## Warranty and after-sale service

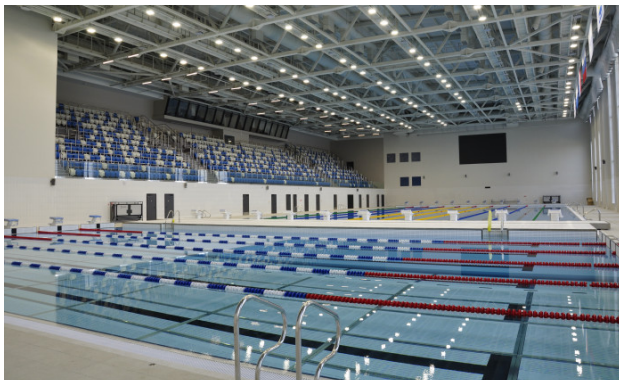

ProGorki Inc. provides a 3-year warranty for the structures of a movable floor. All used equipment and structural parts are supplied with quality certificates. Due to a reliable and solid system, the pool with a movable floor requires a minimum amount of maintenance. Platform finish materials and stainless shaped steelwork that constitute the basis structure are specially selected by our specialists due to high wear resistance throughout the life cycle.

“ ProGorki Inc. has 22 years of experience in design and installation of solid concrete pools, stainless steel pools and SPA pools. Production of pools is our company's core business. We offer services associated with design and installation of facilities of any complexity, from small private pools to waterparks and sports complexes. Specialists of ProGorki Inc. will construct a pool that will comply with engineering, geodesic, environmental and health standards.

## Why choose us?

-  **Quality**  
The high level of services has been confirmed by relevant certificates.
-  **Reliability**  
The safety of our equipment has been confirmed by multiple inspection and certification bodies.
-  **Certificates**  
All our projects comply with construction codes and standards. Our design office has a corresponding license.
-  **Loyalty**  
All customer's preferences and wishes are taken into account in the design process.
-  **Support**  
During start-up and commissioning works, our specialists submit a package of documents for the facility operation and provide obligatory training for the operating personnel. We provide pool and equipment maintenance services, as well as consulting on important operational issues.
-  **Monitoring**  
Proper monitoring and quality control of completed works at every manufacturing stage, as well as the provision of a warranty.

## Movable Floor

-  **Description**  
The range of application of swimming pools can be significantly extended by the movable floor produced by our company. The adjustable floor makes it possible to use pools of different depths in the most efficient way.
-  **Operation**  
The drive system is the basic driving element of the movable floor. Height adjustment is done using floats and wire rope systems. They are controlled by a specialized control unit.
-  **Materials**  
Movable floor supporting structures are made of AISI 304/316 stainless steel. Exterior finish is made of PVC lamella sheets, tiles, decking, natural wood and other materials.

## Benefits

-  **Increased Functionality**  
Various depths of the pool achieved by a movable floor significantly expand the range of possible water activities and classes. A movable pool floor can be raised all the way the surface and turned into a terrace. With the floor in a semi-submerged position, the pool will delight children who can enjoy water activities and be safe.
-  **Safety**  
Our designs are completely safe and designed to meet all current swimming pool standards. Our designs employ precise technical specifications, properly selected building materials, and a safe management system. The permissible load on the movable floor is up to 175 kg/m<sup>2</sup>.
-  **Enhanced Use of Space**  
Due to the movable floor system, the space occupied by the pool can still be efficiently used for any purposes.
-  **Adaptivity and Aesthetics**  
We offer an extensive range of finishes and flowers available to match the aesthetics of your open space
-  **Energy Efficiency**  
A movable floor provides for an ecologically friendly choice. It makes it possible to insulate the pool, reducing heat loss and heating requirements. Thus, power costs are significantly decreased.
-  **Simple to Use**  
Thanks to the quick activation system, it takes less than 7 minutes to open or close the pool. The user-friendly control panel interface makes floor management convenient and easy.
-  **Use by People with Reduced Mobility**  
A movable floor enables slow immersion of people into the water without the need for any special adjustments.

## Design variants

- > **S'POOL**  
For pools up to 6x10 m<sup>2</sup>.
- > **M'POOL**  
For pools from 6x10 m<sup>2</sup> to 10x24 m<sup>2</sup>.
- > **C'POOL**  
For custom-made pools.

## Applications

- > Private pools
- > Hospitality
- > Healthcare
- > Sports complexes
- > Waterparks
